SAMPLE QUESTIONS: C_HANATEC_13

SAP CERTIFIED TECHNOLOGY ASSOCIATE - SAP HANA 2.0

Disclaimer: These sample questions are for self-evaluation purposes only and do not appear on the actual certification exams. Answering the sample questions correctly is no guarantee that you will pass the certification exam. The certification exam covers a much broader spectrum of topics, so do make sure you have familiarized yourself with all topics listed in the exam competency areas before taking the certification exam.

1. You created data and log backups on the file system. Due to a hardware failure, you use the Recover Database app in SAP HANA cockpit 2.0 to recover the crashed SAP HANA database.

From which location does the Recover Database app read the recovery information by default?

a)	<input type="radio"/>	\$(DIR_INSTANCE)/../global/hdb/custom/config
b)	<input type="radio"/>	\$(DIR_INSTANCE)/backup/log
c)	<input type="radio"/>	\$(DIR_INSTANCE)/<hostname>/trace
d)	<input type="radio"/>	\$(DIR_INSTANCE)/backup/data

2. What can you do to shorten the startup time of an SAP HANA system after a reboot?

a)	<input type="radio"/>	Set the preload column value in the Tables system table to FULL.
b)	<input type="radio"/>	Flag all columnar tables for preload.
c)	<input type="radio"/>	Set the savepoint interval to a lower value.
d)	<input type="radio"/>	Partition the row store across nodes.

3. Which of the following traces is active after the SAP HANA installation is completed?

a)	<input type="radio"/>	SQL
b)	<input type="radio"/>	Plan
c)	<input type="radio"/>	Performance
d)	<input type="radio"/>	Database

4. Which prerequisites must be met to set up high availability for a distributed SAP HANA system?

Note: There are 2 correct answers to this question.

a)	<input type="radio"/>	The column tables were assigned to an index server manually.
b)	<input type="radio"/>	The name server is started on all nodes.
c)	<input type="radio"/>	The synchronized backup savepoint is set.
d)	<input type="radio"/>	The shared storage is connected to every host.

5. Which security settings can you monitor in SAP HANA cockpit 2.0?

Note: There are 2 correct answers to this question.

a)	<input type="radio"/>	Data Storage Security
b)	<input type="radio"/>	Password Policy
c)	<input type="radio"/>	Manage Database Backups
d)	<input type="radio"/>	Manage Users

6. You are monitoring the application server of an SAP S/4 HANA system. You need to investigate on the SAP HANA database, but someone locked your personal SAP HANA user.

Which tools can you use to execute an SQL query?

Note: There are 2 correct answers to this question.

a)	<input type="radio"/>	SQL Command Editor of the DBA Cockpit on the application server
b)	<input type="radio"/>	SAP HANA studio on the SAP HANA server
c)	<input type="radio"/>	HDBSQL command line tool on the SAP HANA server
d)	<input type="radio"/>	SAP HANA cockpit 2.0 on a central server

7. Which tasks must you perform to convert a single database to a multitenant database system?

Note: There are 2 correct answers to this question.

a)	<input type="radio"/>	Set the password for the system database user.
b)	<input type="radio"/>	Trigger the conversion in the SAP HANA cockpit 2.0.
c)	<input type="radio"/>	Generate the system database before the conversion.
d)	<input type="radio"/>	Create an operating system user for the converted tenant database.

8. You implement a multi-host SAP HANA system with auto-failover capabilities.

What are the requirements for the disk storage?

Note: There are 2 correct answers to this question.

a)	<input type="radio"/>	The slave node is set to backup standby.
b)	<input type="radio"/>	The failed worker host gets fenced during failover.
c)	<input type="radio"/>	The standby host has file access.
d)	<input type="radio"/>	The master node is fully clustered.

9. You need to enable single sign-on for SAP HANA with Microsoft Active Directory.

Which authentication method allows you to use the Active Directory groups?

a)	<input type="radio"/>	X.509 client certificates
b)	<input type="radio"/>	Security Assertion Markup Language (SAML)
c)	<input type="radio"/>	SAP Logon and assertion tickets
d)	<input type="radio"/>	Kerberos

10. Your customer sets up an SAP HANA system as tailored datacenter integration (TDI) deployment.

What are the enterprise network requirements?

Note: There are 2 correct answers to this question.

a)	<input type="radio"/>	8 GbE storage area
b)	<input type="radio"/>	4 GbE fiber channel
c)	<input type="radio"/>	15 GbE internode
d)	<input type="radio"/>	10 GbE backup

Solutions

<1 a) Incorrect>	<2 a) Incorrect>	<3 a) Incorrect>	<4 a) Incorrect>	<5 a) Correct>
<1 b) Correct>	<2 b) Incorrect>	<3 b) Incorrect>	<4 b) Correct>	<5 b) Correct>
<1 c) Incorrect>	<2 c) Correct>	<3 c) Incorrect>	<4 c) Incorrect>	<5 c) Incorrect>
